Summary

○ I have extensive experience in Flutter app development, specializing in creating real-time, cross-platform applications. My hands-on skills include testing and debugging on both iOS and Android, though I am most comfortable with the Android operating system. In addition to mobile development, I have a background as a web developer. My responsibilities included managing web pages and integrating APIs to ensure seamless functionality and data flow.

○ Flutter Development (Frontend, Backend, API and third party integration)

○ Web Development (Frontend, API and third party integration)

○ Database Management (SQL, NoSQL, Database Handling)

Education

Pillai College of Engineering, Panvel   *Dec 2020 – May 2024*
BTech in Electronics and Computer Science

○ GPA: 8.09/10.0

○ **Coursework:** Computer Architecture, Comparison of Learning Algorithms, Computational Theory, Database Management, Electronic components, Digital electronics, Mobile Computing, Cloud, Mobile and Web App Development

DAV Public School, Panvel   *Mar 2020 – June 2018*
HSC from CBSE Board

○ Percentage: 79.8/100

○ **Coursework:** Basic engineering subjects(Physics, Chemistry and Mathematics), Computer Science(Introduction and advancement in Python, MySQL and SQL basics).

Experience

Flutter Developer (Android/iOS)   *Kharghar, Navi Mumbai*
Prosoft Informatics Pvt. Ltd.   *May 2025 – Sept 2025*

○ Engineered a full-stack, cross-platform mobile application using Flutter, overseeing all frontend and backend development with comprehensive debugging for both Android and iOS platforms.

○ Integrated critical third-party services to enhance app functionality, including GPS and the Google Maps API for location services, Azure Translator for multi-language support, and OCR (Optical Character Recognition) for automated data processing.

Web Developer Intern/ Flutter Developer Intern   *Nerul, Navi Mumbai*
LawCrust Global Consultacy   *Jan 2025 – May 2025*

○ Built and designed responsive websites that work well on any screen, using HTML, CSS, and JavaScript.

○ Developed a mobile app prototype with Flutter, handling all of the frontend (what the user sees) and backend (background work) on Android.

○ Connected key online services to the app by integrating APIs: Razorpay for payments, WordPress for live content, and Twilio for booking confirmations.

Frontend Web Developer Intern   *Ghansoli, Navi Mumbai*
Jio Platforms Ltd   *Jan 2024 – May 2024*

○ Engineered responsive front-end solutions for the RPOS project, leveraging a modern stack of React.js, HTML5, and CSS3.

○ Integrated RESTful APIs for seamless backend data handling and display, utilizing Postman for streamlined

API testing and development.

- ○ Developed dynamic user interfaces with JavaScript to enhance interactivity and overall user experience.

Jt. Tech Head/ Tech Team Volunteer   *Panvel, Navi Mumbai*
IEEE-PCE   *Sept 2022 – May 2024*

- ○ Advanced to Joint Technical Head where I led and mentored a technical team, delegating tasks and providing expert guidance on project execution.
- ○ Contributed as a member of the Technical Team by hosting workshops, designing Google Forms for data management, and configuring and setting up devices to support events.

Projects

Bloggg App   *Bloggg-App* ↗

- ○ A modern Blog App built with Flutter Dart featuring Supabase authentication and SQL database integration. Supports full CRUD operations with Clean Architecture principles for scalability and maintainability. Includes a fully responsive UI for a smooth experience across devices.
- ○ Tools Used: Fluttter, Dart, Supabase, SQL

Billing-System   *Billing-System* ↗

- ○ A modern, responsive billing system web app built using Flutter Web and Firebase. This application allows users to generate, manage, and store customer bills seamlessly. Bills can be exported and printed as PDFs, making it ideal for small businesses or shops that need quick, digital billing solutions.
- ○ Tools Used: Fluttter, Dart, Firebase, FireStore, NoSQL

Pass-Vault   *Pass-Vault* ↗

- ○ A web app used to store the credentials and passwords. The app is build using CRUD functionality, using react framework and hosted on Vercel.
- ○ Tools Used: Reactjs, Javascript

PassWiz-Webapp   *PassWiz-Webapp* ↗

- ○ A React-based web app to check your password strength in real time. It estimates brute-force crack time, calculates entropy, and offers visual feedback. Built for developers users who care about security.
- ○ Tools Used: Reactjs, Javascript

Data-Registration   *Data-Registration* ↗

- ○ A mobile app built using flutter-dart for UI and SQLite for database. It can create and import and export data in the form of CSVs, XLSXs and ODSs. Along with it, it also has Tabular and UI cards oriented data representation.
- ○ Tools Used: Flutter, Dart, Excel, CSV, SQLite

Portfolio   *Portfolio* ↗

- ○ A modern, responsive portfolio website built with Next.js and JavaScript, showcasing my projects, skills, and professional journey. The site features smooth animations powered by Framer Motion, a clean and intuitive UI, and is optimized for performance, SEO, and accessibility. Deployed on Vercel for fast, scalable hosting.
- ○ Tools Used: Nextjs, Javascript

Technologies

Languages: HTML, CSS, JavaScript, Python, SQL, NoSQL, XML

Technologies: Android Studio, Postman, VsCode, XCode

Frameworks: React.js, Next.js, Flutter, Tailwind CSS

Tools: Firebase, Supabase, MongoDB, SQLite
